

# Presentation & Packaging Solutions...*Personalized*

Custom Cover is a sister company of Litho Technical Services and is located in the same building. Together, Litho Tech and Custom Cover offer a single source for all your printing and packaging needs. Our knowledgeable, conscientious team can coordinate your design, match colors, and meet your delivery schedule. For more than thirty years we have been providing documentation coordinated with covers, quickly and accurately.

As our name implies, we savor the challenge of a unique – custom application. Let us help with ideas. We have a large library of samples, and the capability to provide you with the design. By building prototypes and mockups, we will make sure you are comfortable with your design before the production process begins.

Don't settle for the ordinary, give us a call. Let us help you create a look that will be cost effective and enhance your image.

# CUSTOM COVER

Our reputation for quality, value and service has allowed us to grow our capabilities and offer complete solutions for manuals, proposals, and covers. We now offer Turned Edge binders to compliment our existing line of vinyl products and index tabs that we have produced since 1975. Custom Cover, a division of Litho Tech, can also offer one stop shopping for your printing, bindery, assembly, and fulfillment needs.

Options include a variety of sizes, binding options, vinyls, inks, and decoration ideas to give you the CUSTOM look.

## Advantages of Turned Edge construction:

*Excellent visual appeal* – Press sheets can be offset printed, including 4 color process. With our 6 Color offset capabilities we can print high quality litho label, coated one side, at 175 dpi. You may also choose from a wide variety of fabrics in many styles and textures for warmth and elegance. Cloth cover binders can be foil stamped or debossed for that classy look that sets you apart from the competition.

*Durability* – Gluing sheets to both sides of solid chipboard and then creasing the case provides a solid hinge. When you laminate a printed sheet, it reinforces the paper and adds strength that will endure rough handling and still look great. The materials used in the construction are not effected by temperature, so there is no concern with cold cracking like there is with vinyl products.

### Vinyl Binders Silk-Screened

UV silkscreening gives you a customized look with your corporate colors and artwork. We can match vinyl, inks, and artwork with your printed materials to enhance your professional image.

### Debossed & Foil Stamped Vinyl Binders

By utilizing a combination of materials and decoration methods, we can showcase your distinctive look.

### Vinyl View Binders

Give you the flexibility of printing covers and inserting into clear pockets. A good application for on-demand.

### Easel and Split Back Binders

These self supporting binders stand up, and are a good application for presentations or quick reference.

### Post Binders

An excellent choice for binders that need to grow. Can also be expandable for more capacity. The pages are also allowed to lie flat for easy reading.

### Poly Binders

When it comes to durability, polyethylene will stand up to the wear and tear. Poly is available in a variety of gauges and colors for those industrial applications.

### Litho Printed Vinyl

Process color directly on vinyl with the same quality you would expect on paper!

### Digital Printed Vinyl

An economical way to print 4 color process artwork.

### Multimedia Packaging

CD's, audio cassettes, video cassettes, injection molded trays, and custom pockets can all be incorporated into a cohesive package for all your materials.

### Tote Boxes

Tote boxes are ideal for those applications when you have a variety of materials, and you want to keep them all organized in one container.

### Specialty Products

Using vinyl, poly, or other materials, we can manufacture a host of products. Give us your thoughts and we will provide the solution.

### Index Tabs

A manual is not complete without a way to organize the text. So why not coordinate the paper, ink, and laminate with the rest of your materials.
